

ameriTRAM™

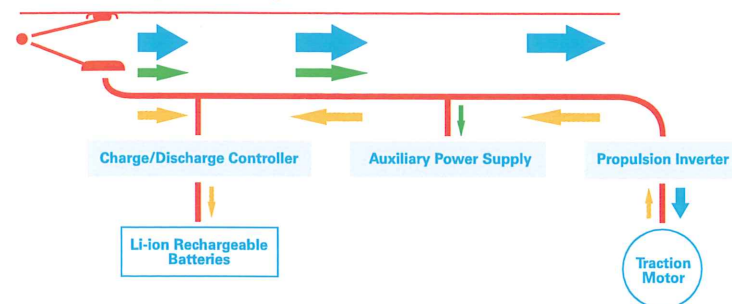

North America's 100% Low-Floor Streetcar

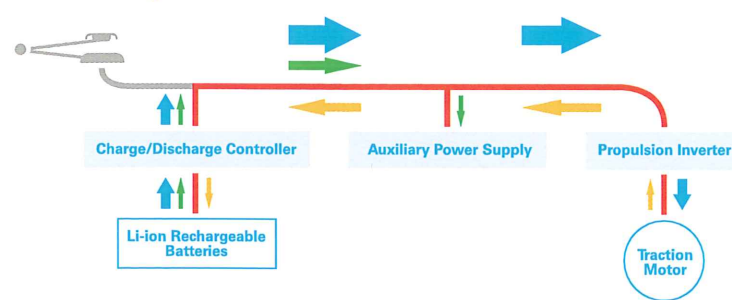

Electro-Hybrid Li-ion Battery Power Propulsion Technology

Through unique e-Brid™ technology, *ameriTRAM™* is propelled by overhead catenary or on-board lithium-ion batteries. e-Brid™ charges the batteries while running on catenary power; and, when in battery mode, uses electricity stored from regenerative braking.

Powered by Catenary

Powered by Li-ion Batteries

Through e-Brid™ technology *ameriTRAM™* provides:

- + **Superior Versatility**
Achieve propulsion where overhead contact wire cannot be installed
- + **Historic Preservation**
Free downtown and historic areas of overhead wires
- + **Improved Aesthetics**
Minimize environmental impact and improve visual aesthetics through wireless sections
- + **Reduced Energy Usage**
Realize immediate savings through lower power consumption via "peak-shaving"
- + **Greater Value**
Save millions in capital investment and operational costs with less electrification equipment and maintenance
- + **Enhanced Public Safety**
Ensure safety of passengers in power outages or inclement weather
- + **Environmental Responsibility**
Realize fewer greenhouse gas concerns through zero emissions and lower energy usage

Engineered For North America

ameriTRAM™ is the only streetcar in North America that is compliant with ADA, Buy America, NFPA-130 and ASME RT-1

100% Low-Floor

With its 100% Low-Floor, *ameriTRAM™* offers:

- + **Improved Passenger Safety**
100% low-floor with no interior steps or ramps
- + **Superior Access**
ameriTRAM™ provides easier access and complies with all ADA requirements throughout the passenger area
- + **Greater Efficiency**
Faster boarding means less dwell time at stations

Flexible Modularity

Expandable design allows for future system growth without increasing fleet size

KINKISHARYO International, L.L.C. is the #1 supplier of low-floor light rail vehicles in North America.

With the introduction of *ameriTRAM™*, Kinkisharyo is the only light rail manufacturer to supply North America with a 100% low-floor, electro-hybrid, zero-emission streetcar powered by either overhead electric catenary or on-board lithium-ion batteries. Headquartered in Westwood, MA, KINKISHARYO has been redefining urban light rail transit systems throughout the U.S. for nearly three decades.
